PATROL MANAGEMENT SYSTEM UPDATED TO 2.0 VERSION

Perfectly adapt to different JWM guard tour systems

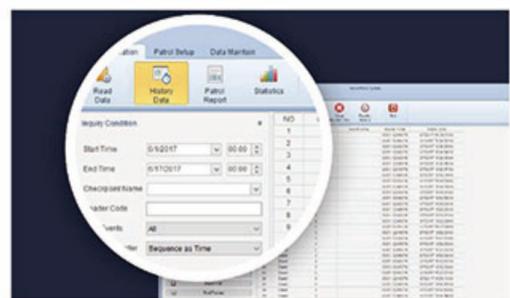

As You Think, A Patrol Plan That Meets Your Requirements

Supervisor James needs the guards patrol every hour from 8:00 to 19:00. And the patrol time changes every week. The report need to record the remain time for each checkpoint. There is 15 days for rest during Christmas. All these requirements are setted in 2.0 management software in 5 minutes.

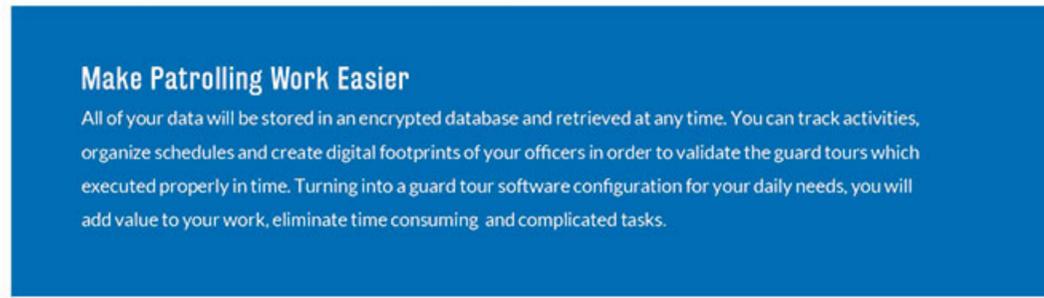

Different Users' Authority Management

Make the management user directly setup the plans, checkpoints and so on information for the security guards. As for security guards, they can only and basically upload the data and inquiry the report. All information can be setup on operator management setup interface. Under this function, the security guard cannot modify report Maliciously.

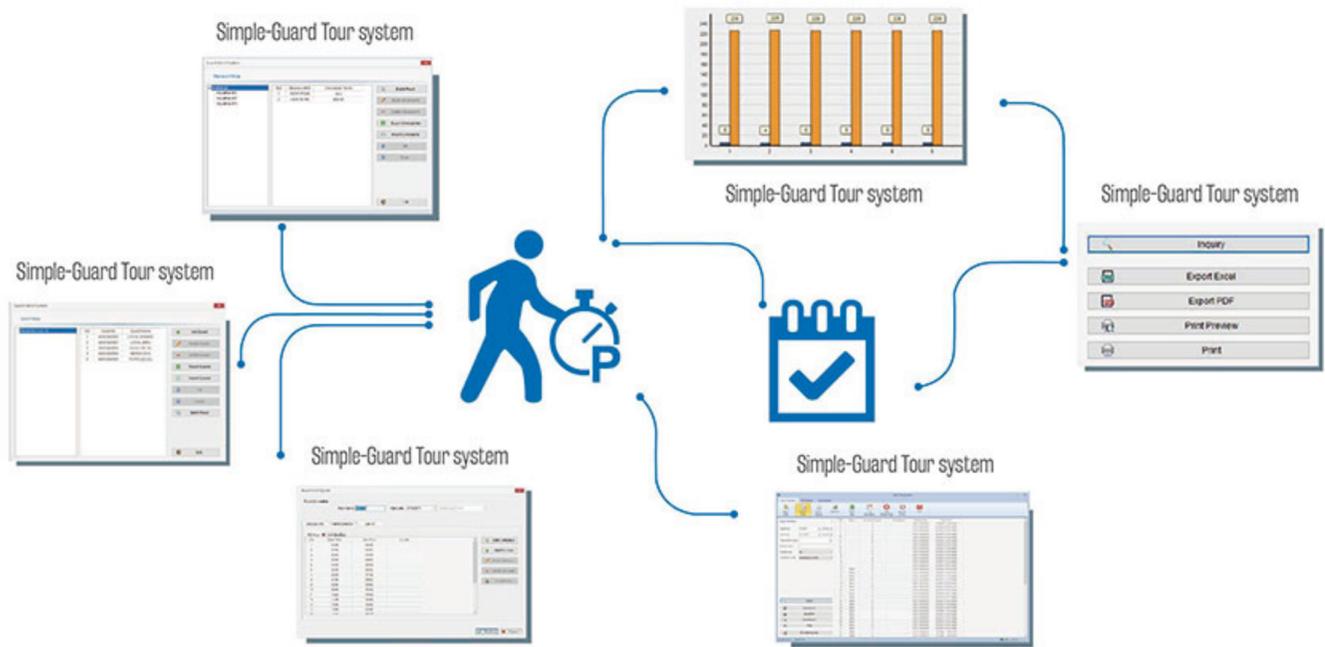

Look Back To Your History Data And Logs

JWM patrol management system will help you record all your history data and get proper historical data logs for all patrols executed in specific time intervals. The officers managing the procedure in the office will not retain data in archives and folders any more but will now be able to conduct a simple look on your computer. Check them to see the guards' reliability and past patrol tours duration.

Make Patrolling Work Easier

All of your data will be stored in an encrypted database and retrieved at any time. You can track activities, organize schedules and create digital footprints of your officers in order to validate the guard tours which executed properly in time. Turning into a guard tour software configuration for your daily needs, you will add value to your work, eliminate time consuming and complicated tasks.
